

Award winning dentistry in a plush atmosphere

The dentists at Laser Dental Associates have been recognized by their peers, as well as their patients, rated among the top doctors in our area. This praise comes as a result of our ongoing efforts to provide the level of care we believe our patients deserve. In addition to equipping our practice with innovative tools and technologies that maximize the potential of each visit, we remember that each patient is an individual.

Maximum care with convenience

We understand how valuable your time is. Our practice has been designed in such a way as to complete treatments quickly, saving you from multiple visits when possible. We utilized technology such as CEREC, which allows us to create beautiful, superior crowns in a single visit. We also maximize the time we have with patients by offering multiple treatment solutions to dental problems, and discussing the particulars of treatment so patients can feel confident in their choice of treatment.

Our Mission

“ We are happy to welcome new patients into our dental family. Laser Dental Associates believes in offering the highest standard of care, which we do by combining personalized service with state of the art technologies. Our compassionate team offers understanding above all, and excellent hands-on treatments to our patients from Troy, Sterling Heights, and surrounding areas. Our practice was founded in 1978, and some of our original patients are still with us today, receiving care that is affordable, comfortable, and effective. It is our mission to make sure your dental experiences at Laser Dental Associates are positive. We look forward to serving your dental needs. ”
